

Alexey Kuptsov

FULLSTACK DEVELOPER

📍 Kazakhstan, Karaganda

ABOUT

Fullstack developer with over 3 years of experience in developing and maintaining web applications.

I have experience in **team collaboration** and **development management**: coordinated the department's work, participated in task planning and technical decision-making for product development. Took part in **architecture design**, **technology selection**, and **code quality improvement**.

Worked not only with web applications, but also with **mobile development** and **browser extensions**. Well-versed in the **full development lifecycle**, adhering to best practices and teamwork processes.

Работаю с современным стеком: **React/React Native, Angular, Next.js, Node.js, NestJS, PostgreSQL, MongoDB**. Опыт работы с **CI/CD**, облачными платформами и **Docker**.

WORK EXPERIENCE

EPAM Anywhere

Dec 2022 - Feb 2023

Trainee Software Engineer (Frontend)

Participated in developing an internal corporate web application as part of an international team. Fixed bugs and improved web application load times.

Results:

- Fixed 30+ UI bugs in a React SPA (Redux, React Router, Axios) for 10+ country locales, ensuring correct display of forms, balance fields, statuses, and business logic per country requirements;
- Optimized web application loading: profiling, eliminating rendering bottlenecks, speeding up initial page loads;
- Worked with enterprise stack: EPAM UUI (internal design system), Elastic APM for performance monitoring, GitLab CI/CD, Jira (EPMVTS tickets), code review in a distributed team.

Stack: React, Redux, TypeScript, Axios, SASS/SCSS, Elastic APM, GitLab CI, Jira

Ecitty

Feb 2023 - Dec 2024

Full Stack Developer

Developed the social network ecitty.com: geo-located post feed, real-time messenger, subscription system, push notifications, admin moderation panel.

Process: Scrum, 2-week sprints. Team: 8 people (2 front, 3 back, designer, QA, analyst/project manager)

Results:

- Designed and implemented GraphQL API from scratch: 40+ queries, 60+ mutations, 9 real-time subscriptions (WebSocket), cursor pagination, Apollo Persisted Queries with Redis caching;
- Built real-time messenger (frontend + backend): private and group chats, delivery/read statuses, typing indicator, reactions, user blocking, push notifications via Firebase Cloud Messaging;
- Implemented full authentication cycle: JWT with automatic access/refresh token rotation, OAuth 2.0 (Google, Facebook), SMS verification (SMSC.ru), WhatsApp OTP. Introduced 3-level rate-limiting and brute-force protection;
- Developed geo-located post feed on React and Apollo Client: publication editor with media upload to S3 (pre-signed URL), Google Maps API map with geo-search of posts (MongoDB 2dsphere), reactions and comments system;
- Designed monorepo architecture (Lerna) with 3 NestJS microservices and 20+ MongoDB collections with optimized indexes (GeoJSON, TTL, compound unique, soft-delete pattern);

SKILLS

HTML	CSS
JavaScript	TypeScript
sass	less
Stylus	TailwindCSS
BEM	React
React Native	Reanimated
Next.js	Angular
React Router	Material UI
Ant Design	Redux
Zustand	MobX
NgRx	Node.js
Nest.js	MongoDB
Mongoose	PostgreSQL
TypeORM	Drizzle
Redis	webpack
Docker	Nginx
Linux	AWS
Yandex Cloud	Sentry
Jest	git
GraphQL	RxJS
Axios	Lottie
Figma	Claude

- 6. On the frontend, introduced MobX (18 stores), PWA with Workbox (precaching, offline, push notifications via Service Worker), code splitting (React.lazy), Sentry monitoring, feature-based architecture with 22+ path aliases;
- 7. Ensured security: Helmet, throttling, AES-256-GCM encryption, anti-spam protection. Wrote 100+ unit tests (Jest). Set up CI/CD on GitHub Actions (auto-tests Node.js 20/22 + MongoDB + Redis) and deployment via Docker Compose + Nginx + SSL;
- 8. Implemented localization for 3 languages (ru, en, kk) on both layers (i18next + Accept-Language), email campaigns (Nodemailer), report system with admin moderation panel, online presence via heartbeat.

Stack: React, NestJS, TypeScript, GraphQL, Apollo Client/Server, MobX, MongoDB, Redis, Docker, Nginx, GitHub Actions, Firebase FCM, AWS S3, Passport.js, Google Maps API, WebSocket, Workbox (PWA), Sentry, Jest, Lerna, FFmpeg, i18next, CSS Modules

Cupcake Development

Dec 2024 - present

Fullstack and Mobile Engineer

Developed commercial products for international clients in a distributed team: logistics platform, browser extensions, food delivery mobile app, cart-sharing SaaS service.

Process: Scrum, Jira, code review, distributed team.

Results:

- 1. Built the backend of a logistics platform on NestJS + Fastify + Drizzle ORM (PostgreSQL): air cargo tariff calculation engine with Excel parsing using Strategy pattern, AmoCRM integration (OAuth2, deal import/export), async route optimization via Yandex MQ + S3, currency conversion via Central Bank of Russia. Deployed to Yandex Serverless Containers;
- 2. Developed two cross-browser extensions (Chrome, Firefox, Safari) on React + TypeScript + Vite/Webpack (Manifest V3): cashback extension with badge injection into search results (Google/Bing/Yahoo) via Shadow DOM, and cart-sharing extension supporting 286 retailers (Amazon, Walmart, IKEA, etc.) via vendor-specific DOM scrapers;
- 3. Built a pizza delivery mobile app on React Native (iOS + Android): catalog, cart, online payment (card, SBP), Yandex Maps (address selection, delivery zones), real-time order tracking via WebSocket, push notifications (FCM + OneSignal), loyalty program, promo codes, stories;
- 4. Performed mobile app performance optimization: memoization (React.memo, useMemo, useCallback), context and cart architecture refactoring, wrote unit tests for hooks, API, contexts, and components;
- 5. Developed React SPA (Jotai, TanStack Query, MUI, Tailwind) and Express.js backend (PostgreSQL, Firebase, Redis, Stripe subscriptions, OAuth via Google/Facebook/Apple/Microsoft) for a cart-sharing SaaS service with retailer API integrations (Amazon PA-API, Walmart, eBay, Kroger);
- 6. Configured CI/CD on GitHub Actions for multiple projects: Yandex Cloud deployment, Docker image builds, DB migrations, Swagger documentation, Sentry monitoring, CodePush OTA updates for the mobile app.

Stack: NestJS, Fastify, React, React Native, TypeScript, PostgreSQL, Drizzle ORM, Firebase, Redis, Express.js, Vite, Webpack, Tailwind CSS, MUI, Jotai, TanStack Query, MobX, Stripe, Docker, GitHub Actions, Yandex Cloud, AWS SES, Chrome Extensions (MV3), Yandex Maps, Sentry, AppMetrica, Swagger, Jest, Puppeteer

EDUCATION

2004-2008

Karaganda Polytechnic College
Information Technology and Programming

2008-2011

Karaganda Technical University
